## SUMMARY

7th-semester B.Tech Computer Science & Design student (available for an 8th-semester internship) with hands-on experience in full-stack development (Python, Django, Flask, SQL) and applied machine learning. Built and deployed OCR, prediction, and fraud-detection models as REST APIs, with internships in AI/ML and frontend engineering. Eager to build scalable, AI-driven software as a Wayfair Software Engineer Intern.

## SKILLS

**Programming:** Python, Java, C, JavaScript, SQL
**Web & Full-Stack:** HTML5, CSS3, JavaScript, Bootstrap 5, Django, Flask, REST APIs
**AI / Machine Learning:** Scikit-learn, Random Forest, Logistic Regression, Pandas, OCR, Feature Engineering, EDA, SMOTE
**Databases:** SQL, SQLite
**Tools & Practices:** Git, GitHub, Postman, VS Code, GitHub Copilot (AI-assisted development)
**Concepts:** Object-Oriented Programming (OOP), Data Structures & Algorithms, Software Development Life Cycle (SDLC)

## EXPERIENCE

**AI/ML Intern** | Kalpas Innovation | Aug 2026 – Present
- Researched, built, and deployed a multi-language OCR system supporting Indian regional languages for real-time text extraction.
- Developed and deployed the OCR model as a Flask REST API; tested end-to-end on printed and handwritten text images.
- Owned the full workflow from model research to API deployment and testing.

**Frontend Development Intern** | Labmentix (Remote) | Oct 2025 – Nov 2025
- Built core frontend features for a freelancer marketplace platform and a Google Drive clone using HTML, CSS, and JavaScript.
- Collaborated with a distributed team of interns to scope, build, and demo two full product features.
- Resolved 10+ frontend bugs/tickets across both projects, aligning shipped UI with design mockups.

## PROJECTS

**Collaborative Project Management Tool** | Django, Bootstrap 5, SQLite, xhtml2pdf | GitHub
- Built a full-stack, multi-user project management web application using Django with a Bootstrap 5 responsive UI.
- Designed the relational data model in SQLite and implemented PDF report generation with xhtml2pdf.

**OCR System for Indian Languages** | Python, OCR, Flask | GitHub
- Deployed a multi-language OCR pipeline as a Flask API for real-time text extraction from printed and handwritten images.

**Car Price Prediction System** | Python, Scikit-learn, Flask | GitHub
- Designed an end-to-end prediction system using Random Forest Regression on a 10,000-row dataset.
- Engineered a Flask REST API serving the model for real-time inference.

**Fraud Transaction Detection System** | Python, Scikit-learn, SMOTE, Flask | GitHub
- Built a binary classification pipeline that handles class imbalance with SMOTE, reaching 95%+ accuracy.
- Deployed via Flask REST API for real-time fraud scoring.

## EDUCATION

**B.Tech in Computer Science & Design** | Sharnbasva University, Kalaburagi | 2023 – 2027 | CGPA: 8.92 / 10
Relevant coursework: Data Structures, Object-Oriented Programming, Full Stack Web Development (Django), AI/ML, Software Engineering

**Pre-University Course (PUC), Physical Sciences** | Vijay Vidyalaya | Completed 2023

## CERTIFICATIONS

- AWS Cloud Foundations – Amazon Web Services
- Cyber Job Simulation – Deloitte Australia (Forage)
- Data Structures Using C Programming
- Python Mega Course
